# CONTENTS OF VOLUME 41

## Number 1

| | | |
|---|---|---|
| | iii | Editors' Statement |
| Q. P. SUN and K. C. HWANG | 1 | Micromechanics modelling for the constitutive behavior of polycrystalline shape memory alloys—I. Derivation of general relations |
| Q. P. SUN and K. C. HWANG | 19 | Micromechanics modelling for the constitutive behavior of polycrystalline shape memory alloys—II. Study of the individual phenomena |
| W. A. CURTIN | 35 | Fiber pull-out and strain localization in ceramic matrix composites |
| J. S. HUANG and L. J. GIBSON | 55 | Elastic moduli of a composite of hollow spheres in a matrix |
| J. M. HILL and Y.-H. WU | 77 | Plastic flows of granular materials of shear index $n$—I. Yield functions |
| J. M. HILL and Y.-H. WU | 95 | Plastic flows of granular materials of shear index $n$—II. Plane and axially symmetric problems for $n = 2$ |
| N. TRIANTAFYLLIDIS and F. K. LEHNER | 117 | Interfacial instability of density-stratified two-layer systems under initial stress |
| S. DEMMERLE and J. P. BOEHLER | 143 | Optimal design of biaxial tensile cruciform specimens |
| B. BUDIANSKY and N. A. FLECK | 183 | Compressive failure of fibre composites |
| Corrigendum | 213 | |
| Announcement and Call for Papers | 215 | |

## Number 2

| | | |
|---|---|---|
| W. A. CURTIN | 217 | The "tough" to brittle transition in brittle matrix composites |
| J. H. HUANG, R. FURUHASHI and T. MURA | 247 | Frictional sliding inclusions |

H. Y. Yu and S. C. Sanday 267 Elastic fields due to centers of dilatation and thermal inhomogeneities in plane-layered solids

R. M. Brannon and W. J. Drugan 297 Influence of non-classical elastic–plastic constitutive features on shock wave existence and spectral solutions

Y. N. Li and R. Y. Liang 331 The theory of the boundary eigenvalue problem in the cohesive crack model and its application

Y. Weitsman and H. Zhu 351 Multi-fracture of ceramic composites

E. M. Arruda and M. C. Boyce 389 A three-dimensional constitutive model for the large stretch behavior of rubber elastic materials

**Number 3**

S. Aoki and T. Kimura 413 Finite element study on the optical method of caustic for measuring impact fracture toughness

P. D. Wu and E. van der Giessen 427 On improved network models for rubber elasticity and their applications to orientation hardening in glassy polymers

H. Gao 457 Surface roughening and branching instabilities in dynamic fracture

J. P. Dempsey and Z. G. Zhao 487 Elastohydrodynamic response of an ice sheet to forced sub-surface uplift

L. W. Morland 507 Compaction and shear settlement of granular materials

X. Deng 531 Propagating interface cracks with frictionless contact

R. Abeyaratne and J. K. Knowles 541 A continuum model of a thermoelastic solid capable of undergoing phase transitions

B. Balendran and S. Nemat-Nasser 573 Double sliding model for cyclic deformation of granular materials, including dilatancy effects

Announcement 613

## Number 4

| | | |
|---|---|---|
| Y. L. Cui and B. Budiansky | 615 | Steady-state matrix cracking of ceramics reinforced by aligned fibers and transforming particles |
| Y. M. Leroy and A. Molinari | 631 | Spatial patterns and size effects in shear zones: a hyperelastic model with higher-order gradients |
| L. Xia, T. C. Wang and C. F. Shih | 665 | Higher-order analysis of crack tip fields in elastic power-law hardening materials |
| C. R. Reid and W. J. Drugan | 689 | Asymptotic finite deformation analysis of growing crack fields in elastic–perfectly plastic materials |
| M. W. Dib and G. J. Rodin | 725 | Three-dimensional analysis of creeping polycrystals using periodic arrays of truncated octahedra |
| K.-F. Nilsson, J. C. Thesken, P. Sindelar, A. E. Giannakopoulos and B. Storåkers | 749 | A theoretical and experimental investigation of buckling induced delamination growth |
| A. Leger and M. Potier-Ferry | 783 | Elastic–plastic post-buckling from a heterogeneous state |

## Number 5

| | | |
|---|---|---|
| R. Lipton | 809 | Inequalities for electric and elastic polarization tensors with applications to random composites |
| A. G. Varias and C. F. Shih | 835 | Quasi-static crack advance under a range of constraints—steady-state fields based on a characteristic length |
| S. Govindjee and J. C. Simo | 863 | Coupled stress–diffusion: Case II |
| F. Erdogan and B. Wu | 889 | Interface crack problems in layered orthotropic materials |
| P. Ståhle | 919 | Dynamic crack tip fields at steady growth and vanishing strain-hardening |
| A. V. Cherkaev and L. V. Gibiansky | 937 | Coupled estimates for the bulk and shear moduli of a two-dimensional isotropic elastic composite |

## Number 6

| | | |
|---|---|---|
| P. M. SUQUET | 981 | Overall potentials and extremal surfaces of power law or ideally plastic composites |
| D. N. DAI, D. NOWELL and D. A. HILLS | 1003 | Eigenstrain methods in three-dimensional crack problems: an alternative integration procedure |
| L. I. SLEPYAN | 1019 | Principle of maximum energy dissipation rate in crack dynamics |
| V. GUPTA | 1035 | Near-tip fields for a crack along an interface between an elastic–ideally plastic crystal and a rigid substrate |
| N. PHAN-THIEN and D. TULLOCK | 1067 | Completed double layer boundary element method in elasticity |
| A. ZAVALIANGOS and L. ANAND | 1087 | Thermo-elasto-viscoplasticity of isotropic porous metals |
| V. TVERGAARD and J. W. HUTCHINSON | 1119 | The influence of plasticity on mixed mode interface toughness |

## Number 7

| | | |
|---|---|---|
| Y.-C. CHIANG, A. S. D. WANG and T.-W. CHOU | 1137 | On matrix cracking in fiber reinforced ceramics |
| Z. SUO | 1155 | Models for breakdown-resistant dielectric and ferroelectric ceramics |
| Y. CHEN and X. JIANG | 1177 | Nonlinear elastic properties of particulate composites |
| P. A. TURNER and C. N. TOMÉ | 1191 | Self-consistent modeling of visco-elastic polycrystals: application to irradiation creep and growth |
| Y. ZHANG and J. T. JENKINS | 1213 | The evolution of the anisotropy of a polycrystalline aggregate |
| L. B. FREUND and F. JONSDOTTIR | 1245 | Instability of a biaxially stressed thin film on a substrate due to material diffusion over its free surface |

## Number 8

| | | |
|---|---|---|
| W. S. Slaughter and N. A. Fleck | 1265 | Compressive fatigue of fibre composites |
| D. J. Benson | 1285 | An analysis of void distribution effects on the dynamic growth and coalescence of voids in ductile metals |
| V. Tvergaard | 1309 | Model studies of fibre breakage and debonding in a metal reinforced by short fibres |
| F. A. McClintock, Q. Zhou and T. Wierzbicki | 1327 | Necking in plane strain under bending with constant tension |
| E. I. Ryzhak | 1345 | On stable deformation of "unstable" materials in a rigid triaxial testing machine |
| V. C. Prantil, J. T. Jenkins and P. R. Dawson | 1357 | An analysis of texture and plastic spin for planar polycrystals |
| J. M. Neumeister | 1383 | A constitutive law for continuous fiber reinforced brittle matrix composites with fiber fragmentation and stress recovery |
| J. M. Neumeister | 1405 | Bundle pullout—a failure mechanism limiting the tensile strength of continuous fiber reinforced brittle matrix composites—and its implications for strength dependence on volume and type of loading |

## Number 9

| | | |
|---|---|---|
| G. Bao and Y. Song | 1425 | Crack bridging models for fiber composites with slip-dependent interfaces |
| B. Budiansky and L. Truskinovsky | 1445 | On the mechanics of stress-induced phase transformation in zirconia |
| H. O. K. Kirchner and L. Ni | 1461 | Domain dependence of elastic Green's, Hadamard's and Bergmann's functions |
| Y. Xu and L. M. Keer | 1479 | Non-steady state solution of a moving crack in an anisotropic solid |
| Yu. Z. Povstenko | 1499 | Theoretical investigation of phenomena caused by heterogeneous surface tension in solids |

D. HARRIS 1515 Constitutive equations for planar deformations of rigid–plastic materials

N. TRIANTAFYLLIDIS and W. C. SCHNAIDT 1533 Comparison of microscopic and macroscopic instabilities in a class of two-dimensional periodic composites

C.-W. NAN 1567 Comment on "Relationships between the effective properties of transversely isotropic piezoelectric composites"

Corrigendum 1571

**Number 10**

F. J. SABINA, V. P. SMYSHLYAEV and J. R. WILLIS 1573 Self-consistent analysis of waves in a matrix-inclusion composite—I. Aligned spheroidal inclusions

V. P. SMYSHLYAEV, J. R. WILLIS and F. J. SABINA 1589 Self-consistent analysis of waves in a matrix-inclusion composite—II. Randomly oriented spheroidal inclusions

Q. JIANG 1599 Macroscopic behavior of a bar undergoing the paraelectric–ferroelectric phase transformation

G. P. CHEREPANOV and L. N. GERMANOVICH 1637 An employment of the catastrophe theory in fracture mechanics as applied to brittle strength criteria

B. J. LEE, D. M. PARKS and S. AHZI 1651 Micromechanical modeling of large plastic deformation and texture evolution in semi-crystalline polymers

Announcement 1689

**Number 11**

K. DANG VAN and M. H. MAITOURNAM 1691 Steady-state flow in classical elastoplasticity: applications to repeated rolling and sliding contact

A. ZUBELEWICZ 1711 Micromechanical study of ductile polycrystalline materials

M. GOLOGANU, J.-B. LEBLOND and J. DEVAUX 1723 Approximate models for ductile metals containing non-spherical voids—case of axisymmetric prolate ellipsoidal cavities

L. W. MORLAND, A. SAWICKI and P. C. MILNE 1755 Uni-axial compaction of a granular material

TUNGYANG CHEN 1781 Piezoelectric properties of multiphase fibrous composites: some theoretical results

A. SHUKLA, M. H. SADD, Y. XU and Q. M. TAI 1795 Influence of loading pulse duration on dynamic load transfer in a simulated granular medium

**Number 12**

V. P. SMYSHLYAEV, J. R. WILLIS and F. J. SABINA 1809 Self-consistent analysis of waves in a matrix-inclusion composite—III. A matrix containing cracks

N. A. FLECK and J. W. HUTCHINSON 1825 A phenomenological theory for strain gradient effects in plasticity

A. P. KARAFILLIS and M. C. BOYCE 1859 A general anisotropic yield criterion using bounds and a transformation weighting tensor

C. LIU, J. LAMBROS and A. J. ROSAKIS 1887 Highly transient elastodynamic crack growth in a bimaterial interface: higher order asymptotic analysis and optical experiments

W. KREHER and A. MOLINARI 1955 Residual stresses in polycrystals as influenced by grain shape and texture

Addenda and Corrigenda 1979

Announcement 1981
